Professional Summary

Flutter Software Engineer specializing in cross-platform mobile development with Flutter and Dart. Experienced in Clean Architecture, SOLID Principles, Repository Pattern, Dependency Injection, BLoC, Cubit, Provider, REST APIs, Dio, HTTP, Supabase, PostgreSQL, Authentication, Row Level Security (RLS), Storage, Realtime Streams, Git, GitHub, GitHub Actions, CI/CD, n8n, Gemini, responsive UI, reusable widgets, and scalable software. Strong problem-solving skills with 130+ Python challenges solved on Codeforces.

Technical Skills

- Languages: Dart, Python, SQL
- Mobile: Flutter, Material 3, Responsive UI, Adaptive Layout
- Architecture: Clean Architecture, SOLID, Repository Pattern, Dependency Injection, OOP
- State Management: BLoC, Cubit, Provider
- Backend: Supabase, PostgreSQL, Authentication, RLS, Storage, Realtime Streams
- Networking: REST APIs, Dio, HTTP, JSON
- Automation: n8n, Gemini, Webhooks
- Tools: Git, GitHub, CI/CD, Android Studio, VS Code

Professional Experience

Flutter Software Engineer

Developed scalable Flutter applications using Clean Architecture and BLoC/Cubit. Integrated REST APIs, Supabase (PostgreSQL, Authentication, RLS, Realtime Streams), GitHub Actions CI/CD, and n8n +writing clean, reusable, maintainable code.

Projects

Rego – Smart Restaurant Management Ecosystem

- Dual Flutter apps (dashboard & table).
- Supabase, Storage, RLS, Realtime, n8n, Gemini.
- Developed a dual Flutter application consisting of an Admin Dashboard and a Customer Table Ordering App.
- [Repository](#)

Swift Chat – Real-time Social & Messaging Platform

- Clean Architecture, BLoC/Cubit, , Authentication, Supabase Realtime Streams, Storage, Realtime Streams.
- Implemented **Authentication, Realtime Streams, Storage**, direct messaging, and social features including posts and comments.
- [Repository](#)
- Demo: [LinkedIn post](#).

Smart School System

- Educational management app using Clean Architecture, Cubit, REST APIs and Dio.

Education

Bachelor of Informatics Engineering – University of Aleppo (2025)

Competitive Programming

Solved 130+ Python problems on Codeforces focusing on algorithms and data structures.

Languages

Arabic: Native

English: Very Good
